[Samsung Introduces Milk Music Studio](#)

[Staff Report](#) / March 11, 2014 4:32 pm [Share](#) [8+1](#) [1](#)

Hypebot reports that Samsung has launched Milk Music Studio for all Samsung Galaxy users. The new service, which includes more than 200 web radio stations and 13 million songs as well as customization options, is operated by Slacker and is currently being offered for free without any advertisements. As compared to other digital music efforts by Samsung to develop their brand, this is certainly a big move to get attention. The service allows users to skip up to seven (7) songs per hour per station. [Read More](#)

(Samsung)

Samsung just launched a streaming service called [Milk Music](#). What is it and why should you care? Here is what we know so far about this brand new music streaming app.

1. Milk Music Is Ad-Free

Milk Music, which just launched today, is an ad-free Internet radio service for Samsung Galaxy devices. You can learn more in the video above.

[The Verge](#) writes that, for now and for the immediate future, the app is ad-free. The app is powered by Slacker Radio, and uses the same 13 million songs from the Slacker library.

2. Milk Music Offers Exclusive Music

Of all the names in the world, Samsung chose Milk Music? what. the.

— Anthony Domanico (@ajdomanico) [March 7, 2014](#)

According to [Engadget](#), Milk Music will offer exclusive, first looks at new music from popular artists. Engadget writes:

“You’ll be presented with a large round dial populated with nine different genre stations along with Spotlight and My Stations. Spotlight is a set of “what’s trending” stations curated by Samsung and Slacker that changes on a weekly basis.

According to Samsung, Spotlight is also an opportunity to deliver Milk Music exclusives and “first-listens” from collaborators like Jay-Z. My Stations, as the name suggests, are stations you create yourself based on a particular artist or song.”

SHARE IT.

Email

3. Milk Music Is Already In Use by Another Party

When you search for “Milk Music,” the first thing that comes up might not be Samsung’s new offering, but an existing band that goes by the same name. You can listen to one of their songs above.

[Milk Music](#) the band has been active since 2008, at least according to their [Wikipedia page](#). Milk Music’s album “Cruise Your Illusion” scored a 7.8 in a [Pitchfork review](#).

4. Samsung’s Milk Music Is For Galaxy Smartphones Only

How long until LG copies Samsung's Milk music streaming service with something called Shake or Smoothie?

[Follow](#)

— Eric Z (@phonescooper) [March 7, 2014](#)

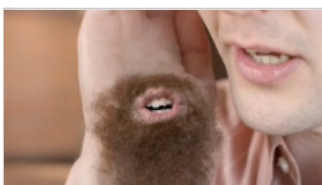

Not only is Milk Music a Samsung-only offering, but it's limited to just a few select Samsung models. [Pocket Lint](#) reports that Milk Music is only available on Galaxy S4 variants, Galaxy S3, Galaxy S4, Note 2, and Note 3. The Samsung Galaxy S5 will support the app at launch.

5. Tech Insiders Don't Like Milk Radio Service

I can't believe how much Samsung got wrong with this: (select) Galaxy only, limited skips, and no way to upgrade or buy tracks.

— dan (@dcseifert) [March 7, 2014](#)

Even though it just launched today, Milk Music is already drawing ire. As you can see above, Verge editor Dan Seifert has some harsh words for Milk. The fact that the app is "Galaxy-only" also seems to be upsetting some Samsung fans. Being ad-free just doesn't seem to be enough to counteract the limitations of this streaming music service, at least for some people.

DMT 191: US SALES, MCNS, ARIANA GRANDE
BREAKING TWITTER, TAYLOR SWIFT'S
EDITORIAL, MILK, RAPGENIUS

JULY 10, 2014 | DMTANLEO | LEAVE A COMMENT

This week on Digital Music Trends it was a real pleasure to welcome [Theda Sandiford](#), VP of Digital Marketing at Republic record, and [Dave Haynes](#), Head of Business Development at [Makeshift.io](#), to the show.

We chat about: – The latest figures released by Nielsen Soundscan on US music sales for the first 6 months of 2014

- The evolution of MCNs and Rightster's acquisition of Base79 for £50 million
- Ariana Grande's campaign which recently drove over a billion Twitter impressions in 24 without spending any money on advertising
- Makeshift.io and Dave's interest in tech startups related to music creation
- Taylor Swift's editorial on the future of the music industry, reactions?
- Samsung pushing hard on Milk with slick advert, reveals the app reached 2 million downloads
- RapGenius closing a deal with Warner/Chappell: with all three major publishers signed, what next?

This week on Digital Music Trends two great guests: Stephen O'Reilly (CMO at [Shuffler.fm](#)) and Stuart Dredge (Journalist at [Music Ally](#), [The Guardian](#)) as well as an appearance by Spencer Hickman ([Death Waltz Records](#), UK Coordinator of [Record Store Day](#)).

This week on the show we talk about Beat Music's introduction of in-app payments on its iOS app and the recent articles suggesting the service hasn't had a flying start, the reports of Shazam being integrated into iOS 8 and what that would mean for both the company and Apple, the reports on Record Store Day 2014 which was very successful but raised a few criticisms from the independent label community, the new lawsuit against Pandora from majors and the RIAA as they seek to get compensated for pre-1972 recordings, Samsung announcing 380k Milk app downloads but considering a premium tier, Rock in Rio's plans for the first Las Vegas edition and much, much more. This weeks' show notes with links to all the stories [are here](#).
